

Credit Name: CSE2140

Assignment Name: exercise 1

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

i made the user input the height and then put it through the proper formula

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

How did you decide on the tools, data structures, or algorithms to use?

the project was small enough that i was able to just think about the entire thing without breaking it into smaller steps

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

How did you test your solution along the way to make sure it was working?

i attempted the entire solution at once, i didnt need to test before the end

Overcoming Challenges

What part of the problem was the most difficult for you?

How did you handle moments when you felt stuck or unsure of what to do next?

understanding the proper formats for Scanner

Learning

Was there anything you learned that you think will help you with future challenges?

Using imports
