

Credit Name: CSE2140

Assignment Name: chapter 4 exercise 11

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

i initialized all of the variables then created the formula, nothing seemed very confusing

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

How did you decide on the tools, data structures, or algorithms to use?

i didnt really break it into parts but it naturally was put into the formula/solving part and then everything else

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

How did you test your solution along the way to make sure it was working?

i wrote the code all at once

Overcoming Challenges

What part of the problem was the most difficult for you?

How did you handle moments when you felt stuck or unsure of what to do next?

nothing seemed very cchallenging

Learning

Was there anything you learned that you think will help you with future challenges?

i didnt learn anything new
